FG - NW | 595x595x110mm | 15.5 Kg

**Technical Information**

## Atlas W Diffuser

Atlas W Diffuser is an attractive solid wood QRD diffuser, designed for mid-high frequency sound diffusion with a range of 630 Hz up to 5000 Hz. Developed specifically to interrupt reflections, Atlas scatters incoming sound waves over a wider area, without removing the energy from the room. Atlas W Diffuser improves sound clarity, creating an even sound field.

With an easy installation procedure, Atlas W Diffuser is available in a wide variety of finishes including lacquered surfaces, such as our limited edition (Gold Version).

Atlas is designed to scatter over any axis. It can be used behind speakers, to treat first reflections, or on the back walls.

Made from wood, from a sustainable and renewable source, its unique design is a welcome addition to any space.
