Technical Information

Douro is a geometric diffuser, designed to scatter and diffuse mid-high frequencies. The solid construction of the unit limits the energy lost to absorption, helping you create a balanced, homogenous sound field.

The Wave shaped pattern guarantees a uniform diffusion pattern. Scattering begins at 400 Hz and offers effective and even diffusion up to 5000 Hz. Douro is available in two sizes, in a selection of premium wood and lacquered finishes.

Douro can be used on walls and ceilings, and can be mounted in any orientation, according to the diffusion pattern you need.
